Welcome to our July newsletter.

Well has summer arrived, it is hard to say. Lots of rain, colder days, heating and lighting still being used which is unusual for this time of year. The effect of this years weather is going to have an effect on your utility bills over the next few months. Why not take a look at the market place through the eyes of APS and look to maximise the savings available to you with an initial **Free of Charge utilities and communications audit**

"Astute Procurement Solutions deliver proven energy and utilities cost efficiency and streamlining to small, medium and corporate companies".

Now saving up to 32% on utilities, and stationary.

Now saving on data back up using our industry specialists.

Now saving 28% on utilities and telecommunications.

Are you looking to feel a little "Greener"?

The move to being a "greener" company is currently a tough decision to make in a market place shrouded in uncertainty. APS can deliver industry experts who dont just sell a product they offer a solution using various products. Our initial audits are free, our report outlines potential areas to become greener and we can the offer the solution to take the next step together with a competitive price from industry leading experts and products.

ICF Construction Now Reality "Greener Building"

Code 5 and 6 building is around the corner for many developers and housing associations.

ICF construction can offer an affordable, deliverable method of reaching higher code levels. Our offering is comparable to today's standard build costs. Why not explore the future of ICF with the APS experts now, be seen as a leader in the development market place, deliver against your green targets and be ready for the future. Building to this level of sustainability now will save money long term as retro fit solutions will not need to be applied to your housing stock in years to come.

Construction can be:

Skeleton

Shell and Core

Fully finished product.

The build rate is rapid for example a recent development of 4 semi detached houses and 2 apartments was to first floor level in 7 days with a workforce of four and a recent

construction of a 5 bedroom individual detached house in Bath was completed within 30 days.

Energy Efficiency Financing gives businesses an affordable means to invest in energy saving equipment straight away, with no additional cost.

Energy Efficiency Financing includes a Carbon Trust energy saving assessment as a matter of course, giving you the peace of mind that the equipment will deliver the energy savings you expect.

Businesses installing more energy efficient technology with Energy Efficiency Financing often also find that equipment is more productive, delivering energy savings and increased earnings.

Increasing numbers of businesses are discovering that with Energy Efficiency Financing, they can afford new equipment, and with the savings, become cash positive right from the start.
