

Lord Mountbatten of Burma, Last Viceroy of India Pictured with Jinnah March 1947

14 August, "Pakistan Day", a significant Milestone . . .

14th of August each year has a significant effect on the lives of all Pakistanis as it was the day set to create a new "Pakistan" carved out of the old India as agreed between Lord Mountbatten, Gandhi and Jinnah (Founder of Pakistan) in 1947.

Although 14th August created a significant line between the British and the new Pakistan in 1947, we are pleased to say it has created a new link between the two countries 66 years later by the agreement between Astute Global Energy Solutions (**AGES**) UK, Mintin Corporation of Pakistan and Impact Global Emission Solutions (**IGES**) UK to form a new registered company in Pakistan named **Impact Global Emission Solutions (Pakistan) Ltd.**

The purpose of this new UK/ Pakistan joint venture is to source Renewable Energy, Railway and other related projects across Pakistan in Government / Private Sectors on local / internationally funded basis. These would include:

Significant Solar Projects, Waste to Energy Projects, Wind Turbine Propositions, LED Lighting Conversion Proposals, Hydro Turbines Fuel and Emissions Reduction Projects Locomotive Parts and many more..

Already, AGES Pakistan Team has conducted over 15 high Level meetings and secured opportunities across Pakistan and we hope to see these turn into long term fruitful relationships.

In addition AGES (Pakistan) is also in process of discussing local Manufacturing opportunities to bring product development "closer to home", involving the local host community as part of AGES Group commitment to Pakistan as a developing nation. We anticipate the achievement of significant milestones over next few months.
